EDUCATION

PDPM IIIT Design And Manufacturing

Bachelor of Technology in Computer Science Engineering

Jabalpur, MP

2022 – Present

Resonance Junior College

Intermediate – Mathematics, Physics & Chemistry (MPC) | 96.9%

Hyderabad, TS

Jun 2020 – May 2022

Gowtham Model School

Secondary School Certificate (SSC) | GPA: 10.0 / 10.0

Hyderabad, TS

2020

SKILLS

Languages	C++, Java, Python, JavaScript (ES6+), TypeScript, SQL
Frontend	React.js, React Native, Next.js, Microfrontends, Tailwind CSS, HTML5, CSS3
Backend	Node.js, NestJS, Express.js, REST APIs, Microservices, RabbitMQ, Amazon SQS
Databases	PostgreSQL, MySQL, MongoDB (Mongoose), TypeORM
DevOps & Cloud	Git, GitHub, Docker, AWS (Lambda, S3, API Gateway, SQS), GCP, Firebase, Vercel
Concepts	OOP, DBMS, OS, Computer Networks, DSA, SDLC, System Design, LLD, Agile

EXPERIENCE

Campx

Jan 2026 – Present

Associate SDE Intern – Full Stack (NestJS, TypeScript, React, Tailwind CSS)

Hyderabad, TS

- Engineered an **Event Management System** on a **multi-tenant SaaS** using **NestJS microservices**, **MySQL/TypeORM**, **MongoDB/Mongoose**, and **React microfrontends** behind a centralized **API Gateway** with tenant-isolated data pipelines.
- Implemented **asynchronous event-driven messaging** via **RabbitMQ** (producer-consumer) and **Amazon SQS** for decoupled inter-service communication; enforced **DTO validation**, **repository pattern**, and polyglot persistence across all production microservices.
- Reduced API calls by **35%** via **memoization** and **React Query** caching; compressed a **2-week React Blueprint** migration into **2 days (7x gain)** using **Claude Code** multi-agent automation.

Docsile

Feb 2025 – May 2025

Full Stack Developer (React, Node.js, AWS, Tailwind CSS)

Remote

- Built a **React.js/Tailwind CSS** web app with **route-based code splitting** (**React.lazy/Suspense**) and **lazy loading**, reducing **First Contentful Paint (FCP)** by **25%**.
- Architected an **event-driven serverless** backend on **AWS Lambda** (Node.js) with **auto-scaling** compute; exposed secure **RESTful APIs** via **Amazon API Gateway** with **request throttling** and stage-level access control.

PROJECTS

Grid – Campus Marketplace | *React Native, Supabase, PostgreSQL, Razorpay* [Link] | [Landing Page]

- Launched on **Google Play Store** – **500+ active users**, **4.9-star** rating – a peer-to-peer campus marketplace for buy, sell, exchange, and service-request listings.
- Built **React Native** cross-platform app with **real-time chat** (**Supabase Realtime**), **push notifications**, and image listings on **Supabase** (**PostgreSQL**, Auth, Storage).
- Integrated **Razorpay** with **HMAC webhook verification** and **PostgreSQL** ledger reconciliation; shipped a **React/Tailwind CSS** Admin Panel (moderation, analytics) and **SEO-optimized** landing page.

Personal Blog Platform | *Next.js 16, TypeScript, Supabase, PostgreSQL, Razorpay* [GitHub] | [Live]

- Architected a **Next.js 16 App Router** blog engine with **React Server Components**, **ISR** (cookie-free **Supabase** client), and dynamic **sitemap/RSS** generation for 100% Lighthouse SEO.
- Engineered **PostgreSQL full-text search** (**tsvector** + **websearch.to.tsquery**), **Row-Level Security (RLS)** on all tables, and **Razorpay** subscription lifecycle (7 webhook types, **HMAC-SHA256**, idempotent deduplication).
- Shipped a **Tailwind CSS** admin panel (**Sharp** WebP/AVIF transcoding, feature flags, **Resend** newsletters) with **HSTS**, **CSP**, **Upstash** rate limiting, and **Supabase Edge Functions**.

SAKHIYA – Patented IoT Women’s Safety Device | *Embedded C++, ESP32, SIM800L, TinyGPS++, Telegram API*

- Developed **ESP32** firmware in **Embedded C++** integrating **SIM800L** (dual **UART/AT-command**), **TinyGPS++** (**NMEA 0183**), force sensor, and push button; published under **Indian Patent No. 202521062326**.
- Implemented a **5-state emergency state machine** with a **10-second Telegram Bot** cancellation window; on timeout, dispatches a **GSM voice call** + **SMS** with a **Google Maps** link – dual-redundancy triggers (analog threshold + debounced SOS) with **GPS validity gating**.

LEADERSHIP

- Co-convener**, Central Mess Committee at IIITDMJ – managed operations and feedback for 1000+ students.
- Volunteer**, Jagriti (tribal community service camps, Jabalpur) and **DeW 9.0** (workshop logistics for IIITDMJ’s flagship design event).
